

Feedback-Questions around the outcome indicators: Women's Economic Empowerment

- **Indicator # 17: How do we measure 'equal participation in decision-making' in a way that is comparable and compatible across a region or group of countries?**
- **Indicator #18: Does the definition of the indicator include informal workers (e.g. in projects where this is our beneficiary groups)?**
- **When reporting on the WEE indicators, should we only report data about Women participants? Or should it also include Men involved in the project actions?**
